Sir:

The instant paper, transmitted by facsimile, corrects an apparent clerical error appearing in the Remarks/Arguments of the response (Amendment) filed December 22, 2003.

The error appears in the 2nd sentence of the last paragraph at page 3 of the Amendment. As corrected, the sentence reads:

None of the cited references recognized the importance of the volume of the liquid electrolytic medium corresponding to the spaces between the particles in a dry packing, i.e., the volume of the medium being equal to or (a little) larger ~~are~~ than the volume of a dry packing of the metal. This assures direct contact among almost all of the particles.

The error is regretted.

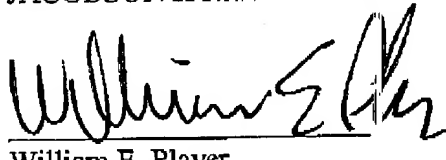

Respectfully submitted,
